Dear The Federal Communications Commission,

Enough is enough! I am tired of paying more than my fair share for what others should be paying!

My paycheck has not been keeping up with the increases in health care, gas prices, higher education costs and now this!

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

I got rid of my long distance and use phone cards because they are cheaper and I can pay as I go! I have my cell phone for safety and to use for emergencies.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I don't want to pay more so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

Sincerely, Anna McCartney 11078 Freeport Lane North East, PA
